

LEED CERTIFICATION LETTER NATURAL HUES on ECO-BODY

October 2010

Eco-Body --LEED Certification of 42% recycled content – Eco-Body

To whom it may concern:

Eco-Body is a glazed ceramic tile product that meets not only the technical guidelines of Presidential Order 13101 and the EPA, but the spirit of the order as well. This certification letter reflects the latest information available from our factory and various governmental agencies. Recycled content can change over time because of new guidelines, operating conditions, suppliers and availability of raw materials. Please check our website at www.quarrytile.com for the latest information on Eco-Body.

Eco-Body currently contains about 42% total recycled content as defined by the latest EPA Guidelines, LEED 2.2 and ISO 14021. It is a combination of pre-consumer wastes collected and recycled from Quarry Tile Co manufacturing operations and pre-consumer solid wastes from the computer industry. Prior to ISO 14021 and LEED2.2, pre-consumer wastes were called post-industrial wastes.

Eco-Body's current recycled content is a combination of pre-consumer grinding paste from the computer industry, and pre-consumer recycled glaze waste and other recycled wastes from our waste water recycling system. All of the recycled wastes are collected, weighed, mixed and processed to form a homogenous and refined powder. This powdered blend is then added to virgin clays and other additives to create our Eco-Body. All of the recycled waste products and clays are locally sourced in Spokane, WA. Therefore your project may earn additional LEED points for locally sourced materials if it is within the required distance.

Like all of Quarry Tile Co.'s products, Eco-Body meets or exceeds all of the requirements of ANSI 137.1 section 6.1 for Glazed Quarry Tile. It is available in 50 plus colors, 13 field tile sizes and all of the key trim shapes needed for floors and walls. Eco-Body does not carry a premium price when compared to other Quarry Tile Co. products.

If you have any other questions, please don't hesitate to call.

Sincerely,

J Thomas Sawyer
